

CHECK POINT CERTIFIED CLOUD SPECIALIST-ADMINISTRATOR (CCCS-A)

AUDIENCE

Technical professionals who support, install, deploy, or administer Check Point products in Cloud Environments.

GOALS

Learn basic concepts and develop skills necessary to administer Check Point CloudGuard security solutions.

PREREQUISITES

Working knowledge of Cloud Native Deployment using Microsoft Azure and Amazon Web Services, TCP/IP Networking, and Check Point Security Products. Check Point recommends that students who wish to expand their knowledge participate in the CCSA and CCSE courses.

TOPICS

Introduction to Cloud Security

Introducing CloudGuard

CloudGuard Architectures

CloudGuard Security Policy

CloudGuard Automation

CloudGuard Troubleshooting

Introduction to Cloud Security Posture Management

OBJECTIVES

- Explain the nature of the cloud environment.
- Describe the five pillars of cloud architecture.
- Explain the Basics of Cloud Infrastructure.
- Explain the Basics of Cloud Automation.
- Explain Check Point Security Management and How it Applies to CloudGuard.
- Describe CloudGuard Security Gateway offerings.
- Describe Cloud Load Balancers.
- Explain CloudGuard Licensing.
- Explain the different Deployment options and architectures for CloudGuard.
- Explain how and why CloudGuard is automated.
- Describe the functions of CloudGuard that can be automated.
- Describe the tools used to automate CloudGuard.
- Explain CloudGuard Automation Requirements.
